

iMotion

Directions

1. *Download the iMotion App on your iPhone or Android*
2. *“New Movie”*
3. *“Manual”*
4. *Enter movie title*
5. *Tap “Start”*
6. *Take a photo by selecting “Capture”*
7. *Move your figures around slightly and take photos every time*
8. *When you are done taking ALL photos, double click “Stop”*
9. *Move the slide bar to the LEFT if the video needs to be slowed down*
10. *Click the camera icon to add more photos to the video*
11. *Select “Export”*
12. *Leave “Video” selected. Select “Photo Library”*
13. *To save the video to your phone, go to photo library and Air Drop the selected video. *Otherwise, we’ll post all the videos to the Briscoe Museum Facebook page later this week!*

TIPS

- *To delete a photograph after you take it, select “Cancel.”*
- *You can only delete the last frame, not one in the middle.*
- *For a smooth animation, aim for at least 5 photographs per second*

- *Make small differences between each photograph.*
